Our founder, and father, Ernest A. Beck apprenticed in the worlds largest and internationally renowned German surgical instrument manufacturer. When Ernie returned home to the United States, he worked in his father’s surgical instrument business and then in his own surgical instrument factory. In 1954 Ernie began importing the highest quality instrumentation that German manufacturers had to offer. Calling directly on doctor’s offices with his sample case, he was able to develop E. A. Beck & Co based not only on what he knew was available from German factories but also on the needs of his customers.

Ernie stayed involved with E. A. Beck & Co. until the very end of his life as he trained us, his daughters, who now continue to take enormous pride in the products that we both import and also manufacture ourselves. We stand solidly behind our German and American made products with a lifetime guarantee against any workmanship or manufacturer’s defects.

For over fifty years we have been in the business of providing imported and domestic dental instruments with the same exacting attention to detail and quality that our dad made the BECK hallmark and tradition.

Carol Beck Swickard
Virginia Beck Pender
TERMS

PRICES

All prices are listed FOB Costa Mesa, shipping and handling charges will be added to the invoice. The established prices in our price list are subject to change without notice. Current prices prevail at time of placement of order.

ORDERS

All orders are subject to condition listed. Most orders are shipped within a few days of receipt.

ORDERING

Orders may be placed by the following methods:

- Toll free within the United States and Canada: (800) 854-0153
- Local: (949) 645-4072
- Fax: (949) 645-4085
- Email: eabeck@sbcglobal.net

TERMS OF PAYMENT

Our terms are net 30 days from invoice dated. Past due invoices are subject to a finance charge of 2% per month (annual rate of 24%). All invoices must be paid in U.S. dollars.

INSTRUMENT WARRANTY

All of our Beck American made and German imported instruments carry a lifetime guarantee against any defects in material and workmanship. Our Polish imported instruments carry a five year guarantee against any defects in material and workmanship. Items from our economy line have no guarantees.

REPAIR SERVICE

We have a full service repair facility. We will repair, sharpen, re-serrate and adjust - most instruments from manufacturers other than Beck. We are not able to re-insert pliers from other manufacturers. All repairs are subject to a minimal charge.

RETURNED MERCHANDISE

Any items returned must be in new and resalable condition. Returned merchandise may be accepted for credit only. No merchandise will be accepted for credit after 30 days without previous consent. Items returned for credit after 30 days may be subject to a restocking charge. All items returned for repair or credit must be accompanied by a note stating reason for return. E.A. Beck & Co. cannot accept any liability for damaged or lost merchandise, thus all returns must be insured for full value and sent postage prepaid to:

E.A. BECK & CO.
657 W. 19TH ST., STE E
COSTA MESA, CA  92627

CONDITIONS

Since all products are constantly undergoing changes in manufacturing methods and designs, we reserve the right to change specifications and prices without incurring any obligation.

The ramus retractor is designed as an instrument for surgical procedures involving the ramus area where exposure is gained via an extra-oral approach. Athroplasties, condylar fractures, prognathis and retrognathic mandibular corrections are specific surgical procedures in which this instrument is most valuable.

Suction Tips

- These suction tips are made in the USA
- Custom manufacturing available - send us your sample; we can make tips to your specifications
- Made of surgical stainless steel
- The #2 suction tip comes with a breaker hole at the tip

Suction Tip Brushes

12” length
Sold in packages of one dozen

200-874 Small - 1/8”
200-875 Medium - 1/4”
200-876 Large - 1/2”

Specially designed for aspirator tips and saliva ejectors, these brushes come in various sizes to accommodate a wide range of tubular diameters. White nylon bristles are stiff enough to clean blood and debris away from inside walls in one or two sweeps. The stainless steel wire prevents rusting on sinks and counter tops after use. Made 12 inches long, these extra length brushes will extend the full length of aspirator tips and are flexible enough to round 45 and 90 degree curvatures.

"ULTRA SHARP" SCALPEL BLADES, Carbon Steel
STERILE

DETSCH SWIVEL LOCK BLADE HANDLES

This unique series of instruments designed by Steven G. Detsch, DDS incorporates a recently patented Swivel Lock* for securing disposable surgical blades. This locking mechanism has been adapted to stainless steel instrument handles, which reproduce the long familiar Kirkland and Orban knife blade angulations. This allows the surgeon the convenience of using sharp, disposable blades mounted on instruments angled to easily reach the most difficult areas in the oral cavity or elsewhere. These handles are both available single and double ended.

100-756 DETSCH #1 S/E KNIFE, STRAIGHT
100-757 DETSCH #2 S/E KNIFE, 30°
100-758 DETSCH #1-2 S/E KNIFE
100-759 DETSCH #3 S/E KNIFE, LEFT 40°
100-760 DETSCH #4 S/E KNIFE, RIGHT 40°
100-761 DETSCH #3-4 D/E KNIFE 40°
100-762 DETSCH #2 D/E KNIFE, 30°

Mounted blade with rear portion removed. T cleat fits snugly into narrow slot.

Rotate blade 90°. Slide slot under T cleat.

Detsch Gingival Knife
Designed by Dr. Steven G. Detsch

100-769 6mm wide graft
100-768 10mm wide graft

Grafts can be taken rapidly from the palate or other suitable sites. It’s easy to procure free grafts 6mm wide, 8 to 1.0mm thick, with a smooth connective tissue surface to any length desired. Your grafts will adapt easily to recipient sites and heal rapidly.

Plus, you’ll minimize your patient’s discomfort since the donor sites respond quickly to the uniform, minimum thickness of the grafts. Complete epithelialization occurs at approximately one week.

We custom manufacture instruments to your specifications

500-405 #5, 15/16”

Sold in boxes of one dozen
Cone socket handle sold separately.

**Round handle 100-733**

**Serrated octagon handle 100-730**

**Hand form hollow handle 100-734**

1 1/2” mirror acts as a cheek retractor. You can view an entire quadrant at once.

500-407 - 1 1/2” Regular
500-408 - 1 1/2” Magnifying
Sold individually. Cone socket handle included.
INSTRUMENT CARE

RUST AND STAIN REMOVER
Removes rust and stains which restores luster to instruments. Dissolves stain and residue which helps free box joints.

We have been using this product in our repair department for over 10 years.

R-P10
Instantly penetrates tight plier joints. Penetrating oil carries rust inhibitor and silicone into joint. Residual deposits help reduce reoccurrence of tightness.

SLICK
Pure silicone in aerosol can for instant lubrication.

COLOR CODE RINGS

502-300 Purple
502-301 Blue
502-302 White
502-303 Yellow
502-304 Green
502-305 Flame

502-307 Black
502-308 Pink
502-309 Brown
502-310 Beige
502-312 Teal
502-311 Assorted (10 each of 12 colors)

Made of silicone to withstand high heat up to 425 degrees.

ETCHING MACHINE

For personalization of all your instruments. Eliminates chances of misplaced instruments when used outside the office.

#80-003
All purpose enzyme cleaner

#3-750

Multi-Enzyme Concentrate
Contains 32 3/4 fl. oz. (22ml) packets
Makes 32 gallons of solution

USES:

Presoak
Ultrasonic Cleaner
Evacuation System Cleaner
Laundry Presoak

Send us your instruments for repair. Please see page 79 for more information.

We custom manufacture instruments to your specifications

(800) 854-0153   (949) 645-4072  Fax (949) 645-4085
www.beckinstruments.com   Email: EABeck@sbcglobal.net
**PROBLEMS AND SOLUTIONS**

**Staining and spotting**
- Insufficient rinsing after ultrasonic cleaning
  - Rinse thoroughly under steady stream of water for recommended time

- Insufficient drying after ultrasonic cleaning
  - Rinse with hot water, dip cassettes in alcohol after rinsing

- Contaminated ultrasonic solution
  - Solution should be changed at least once daily

- Sterilizer has not been cleaned
  - Sterilizer should be cleaned weekly per manufacturers recommendation. Use only distilled water for reservoir

**Rust**
- Inexpensive instruments not having undergone proper manufacturing process
  - Remove instruments from service

- Improperly maintained autoclave; rust transfers from corroded pipes to drum to instruments

- Clean and flush water lines in sterilizer to manufacturers recommendations

- Disinfect inner chamber

**Pitting**
- Chemical attack on instruments
  - Rinse and dry instruments thoroughly; use approved cleaning and sterilization solution only

**Brown/Orange Stain**
- Contaminated sterilizer, high alkaline detergents, cold disinfectants, dried blood, copalite, water source, surgical wrappings

- Clean sterilizer, use neutral Ph solutions, clean and rinse instruments thoroughly using COOL SOAK RUST AND STAIN REMOVER available from BECK

**Rainbow Stain**
- Chromium oxide stains resulting from excessive heat
  - Can be polished off, but need to have manufacturer check hardness

**Cracked Hinge**
- Excessive force by user; Sterilized in the closed position
  - Confirm intended use for instruments. Replace instruments
REPAIR INFORMATION

Following is a list of the most common repairs that we see. If you do not see your item on the list, just give us a call and we will let you know if we are able to service your repair.

SHARPENING
